ABSTRACT

This report presents detailed information concerning the member institutions of the United Negro College Fund (UNCF), an organization which includes 41 privately supported historically black colleges and universities in the United States. Tables, graphs, and narrative are organized into sections on enrollment, admissions, degrees, faculty and staff, student financial aid, college costs, institutional finances, and endowment. Highlights of the data include: enrollment at all UNCF institutions in 1995 was 54,388, 28 percent greater than in 1986; about two-thirds of all UNCF students come from the Southeast; 6,709 bachelors degrees were awarded by UNCF institutions in 1993-94, an increase of 3 percent over the previous year; in Fall, 1995, the average faculty salary at UNCF was $30,658, two-thirds the average at all private four-year colleges; at UNCF colleges, 85 percent of students received some form of financial aid in Fall, 1994; the UNCF average charge for tuition and fees ($5,617) remains nearly 50 percent less than that charged by private colleges nationally; and endowment funds at UNCF colleges increased slightly to $533.7 million. Thirty-one appendices provide tables presenting additional data. (DB)

The College Fund/UNCF

Statistical Report 1996

Acknowledgment and Foreword

I wish to thank a number of people for their assistance in preparing this 1996 edition of the **UNCF Statistical Report**. Karen Winters, former administrative assistant for the Leadership and Organizational Development Program, compiled most of the data. The registrars and institutional research personnel at the member institutions supplied most of the data as they responded to an extensive questionnaire; their efforts were invaluable. I also wish to thank Mallery Hobbs and Erica Rhodes of the Frederick D. Patterson Research Institute for their efforts in completing the printing of the total document and Michael Fraser of Information Technology for designing the cover on the report. Finally, I would like to thank Mr. William H. Gray, III, president and CEO of The College Fund/UNCF and Dr. Michael T. Nettles, executive director of the Patterson Research Institute, for their leadership, encouragement, and support.

Hugh R. Fordyce

INTRODUCTION

The 1996 UNCF Statistical Report presents detailed information concerning the member institutions of the United Negro College Fund in 1995. Data for the report was generally obtained from the annual UNCF Questionnaire completed by college administrators during the 1994-95 academic year. In a few instances, the colleges were unable to supply data; in these cases, the missing data was either estimated or the previous year's data was used. Questions regarding the data were resolved by making direct phone calls to the colleges. Data regarding freshman characteristics was obtained from the 1994 report of the Cooperative Institutional Research Program: The American Freshman. Data concerning 1995 fall enrollments was obtained from telephone survey of UNCF registrars in early November 1995. The report uses the same organizational format that has been used in recent years and offers some interpretation concerning yearly trends.

The member colleges of the United Negro College Fund are a part of a group of 103 historically black colleges and universities (HBCUs); together, these institutions constitute only about three percent of all colleges and universities in the United States, but they graduate over a quarter of all African-Americans who earn the baccalaureate degree and nearly 40 percent of African-Americans who later earn a doctoral degree. Of the 48 privately supported HBCUs, 41 are member institutions of the United Negro College Fund.

With few exceptions, most UNCF member institutions were founded by religious societies from the North during the 35-year period following the Civil War. All UNCF institutions are accredited by appropriate regional accrediting associations. Located principally in the Southeast and in eastern Texas, these institutions operate with a variety of organizational structures and program offerings.

The United Negro College Fund was founded in 1944 by Dr. Frederick D. Patterson (of Tuskegee Institute) and 27 other college presidents, who were convinced that private, historically black colleges should bind together for their mutual benefit. Although its major focus is still its fund-raising efforts for the benefit of the member colleges and universities, the UNCF has recently established a research division, the Patterson Institute, which conducts research on the whole range of issues affecting the education of African Americans at all levels.

The UNCF member institutions have made great contributions to the education of minority students over the past century. The list of distinguished graduates from UNCF colleges includes civil rights leaders, political leaders, religious leaders, educators, scientists, lawyers, and physicians. Four UNCF colleges consistently rank among the top ten institutions in the country in supplying black applicants for medical schools.

HIGHLIGHTS FROM THE 1996 UNCF STATISTICAL REPORT

✔ For the third straight year, enrollments at all UNCF colleges and universities exceeded 54,000; the 1995 enrollment figure of 54,388 was 28 percent larger than that recorded in 1986; enrollments at UNCF institutions have increased in five of the last six reporting years.

✔ About two-thirds of all UNCF students come from the Southeast. Georgia, with 6,169 students, sends more students to UNCF institutions than any other state. Over the past ten years, however, the state that has shown the largest percentage growth in sending students to UNCF colleges has been California. Since 1983, the number of students coming from California has increased from 733 to 2,066, a 181 percent increase.

✔ Cities which send at least 1,000 students to UNCF colleges include Atlanta, Birmingham, Chicago, Memphis, Miami, New Orleans, and New York City.

✔ Since 1986, the enrollment of women has increased at a faster rate than that of men. Women constitute 60 percent of the total enrollment at all UNCF institutions in 1994.

✔ Over 60,000 applications for admission to UNCF institutions were received for the 1994 term. Applications have increased 66 percent since 1986. About 64 percent of all applications were accepted. Of those admitted, 35 percent chose to enroll.

✔ Some 6,709 bachelors degrees were awarded by UNCF institutions in 1993-94; this was an increase of three percent over the previous year and 40 percent increase since 1989.

✔ Business and management was again the field with the largest number of bachelor's degree graduates in 1993-94; business and management continues to lead other fields by a considerable margin in the number of degrees awarded.

✔ Since 1990-91, the field of education has shown an impressive 63 percent gain in the number of graduates.

✔ In fall 1995, the average faculty salary (for all ranks) at UNCF institutions, $30,658, was only two-thirds as high as the $45,330 found at all private four-year colleges.

✔ In 1994-95, the percentage of full-time faculty at UNCF institutions who held the doctorate reached an all-time high—58 percent.

✔ At UNCF colleges, 85 percent of the students received some form of financial aid in fall 1994. Over one-third of all UNCF students needed total financial assistance.

✔ The Stafford Loan program is now the single largest financial aid program at UNCF institutions both in terms of students served and in the total amount of funds made available to students.

✔ Because of the growing financial needs of students, UNCF colleges have dramatically increased the proportion of their operating funds allocated to student aid. Student aid has risen from 12 percent (in 1985-86) to 18 percent of the operating budgets at UNCF institutions.

✔ The UNCF average charge for tuition and fees ($5,617) remains nearly 50 percent less than that charged by private colleges nationally ($11,025).

✔ The average overall institutional cost of attending a UNCF college in 1994-95 increased by less than $450 over the previous year—from $9,197 to $9,564.

✔ Endowment funds at UNCF colleges increased modestly during the past reporting year and now stands at $533.7 million. The average value of the endowment fund at a UNCF institutions is 13.0 million.

ENROLLMENT

Fall enrollment figures for fall 1995 show that 54,388 students were enrolled at the 41 member institutions of the United Negro College Fund (UNCF). This is the third consecutive year in which enrollments have exceeded 54,000. The fall 1995 enrollment is slightly less than the record figure for fall 1993, but slightly larger than the number enrolled in 1994. Since 1986, enrollment increases at UNCF colleges have averaged about three percent per year.

During the one-year period between 1994 and 1995, enrollment gains were posted by 22 of the 41 UNCF institutions. For the second year in a row, the largest numerical gain was recorded by Benedict (SC) College; Benedict increased its enrollment by 361 students during the one-year period—from 1,501 to 1,862. The largest percentage increase was found at Jarvis Christian College; Jarvis Christian's enrollment jumped by 38 percent—from 387 to 533. Other institutions with enrollment gains of ten percent or more included Florida Memorial College, Morris Brown College, Philander Smith College, Texas College, and Voorhees College. With a total of over 5,000 students, Clark Atlanta University continues to lead all UNCF institutions in enrollment. Shown above in Table 1 are the UNCF institutions with 1995 fall enrollments of 1,800 or more.

Corrected data for fall 1994 show that a total of 54,284 students were enrolled at that time. (This is a slight increase over the preliminary number reported in the 1994 Statistical Report.) See Table 2 and Figure 1.

Appendix A shows the total fall (head count) enrollments at each UNCF member institution from 1990 through 1995.

The enrollment gains at UNCF institutions have been impressive in recent years and are indicative of a resurgence in college attendance by African-Americans. After several years of decline during the early '80s, African-American proportional representation in U. S. colleges and universities has increased in recent years. Although the gains in enrollment have been significant, African-Americans still constitute only about ten percent of the total U.S. college enrollments even though they constitute about 15 percent of the college-age population in the U.S. To achieve equity, the college enrollments of African-Americans should be increased by about one-third.

TABLE 1

Bethune-Cookman	2,402
Morris Brown	2,101
Spelman	1,961
Benedict	1,862

FULL-TIME AND PART-TIME STUDENTS

In fall 1994, most students at UNCF colleges were full-time students. Of the 54,284 enrolled students, 49,875 (92 percent) were classified as full-time. Almost half the 41 UNCF member colleges showed enrollments that were composed almost exclusively—95 percent or more—of full-time students. In contrast to the high proportion of UNCF students who were classified as full-time, recent U.S. Department of Education data show that nationally only 59 percent of the undergraduate enrollment was classified as full-time. Appendix B shows the numbers and percentages of each college's full-time and part-time students.

BEST COPY AVAILABLE

Classification

Of the total fall 1994 enrollment of 54,284, 20,649 (38 percent) were classified as freshmen.[1] Compared to fall 1992, the percentage of students classified as freshmen has decreased significantly—from 41 percent to 38 percent. With a larger proportion of their students classified as sophomores, juniors, and seniors, it would seem that UNCF colleges are retaining a higher proportion of their entering students and or enrolling more students in the upper division who have transferred into the institutions. Some 10,607 (20 percent) were classified as sophomores; 9,186 (17 percent) were juniors; and 9,200 (17 percent) were seniors.

Four percent of the enrolled students were classified as graduate or professional students and another four percent were classified as either "special" or "other" students. The UNCF institutions that offer graduate professional studies include Clark Atlanta University, Fisk University, the Interdenominational Theological Center, LeMoyne-Owen College, Livingstone College, Tuskegee University, Virginia Union University, and Xavier University.

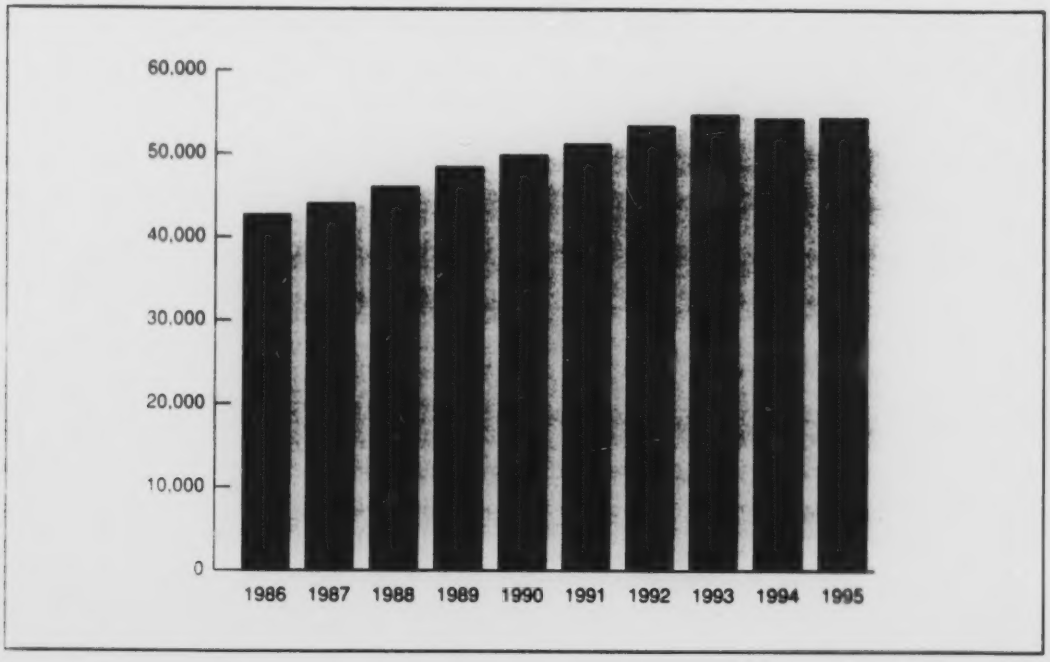
Appendix C provides the institutional enrollment breakdown by classification.

Race/Ethnicity and Citizenship Background

Ninety-five percent (51,705) of the students at UNCF institutions in fall 1994 were African-Americans. The largest group of students who were not African-Americans were the 858 nonresident aliens; these students constituted 1.6 percent of the total; the largest number (177) of nonresident aliens was found at Oakwood College; other institutions with 50 or more non-resident aliens included Bethune-Cookman College and Xavier University. The 836 white students on UNCF campuses constituted 1.5 percent of the total enrollment; three UNCF institutions—Huston-Tillotson College, Tuskegee University, and Xavier University—each enrolled 100 or more white students. The number of Hispanic students increased slightly during the 1994-95 year—from 282 to 321; the largest numbers of Hispanic students were enrolled at Florida Memorial College and Tuskegee University. The largest contingents of Asian-American students were found at Huston-Tillotson College, Philander Smith College, and Xavier University.

Appendix D provides detailed data regarding the enrollments at each UNCF institution with respect to racial/ethnic background.

Figure 1
UNCF Fall Enrollments Since 1986



1 The freshman classification included new students as well as some returning students who had not accumulated enough credits to be classified as sophomores.

TABLE 2

Total Enrollments at UNCF Member Institutions 1986-1995

	Enrollment	Percent Increase Over Previous Year	Percent Increase Since 1986
1986	42,613	—	—
1987	43,984	3.2	3.2
1988	45,987	4.6	7.9
1989	48,396	5.2	13.6
1990	49,816	2.9	16.9
1991	51,181	2.0	20.1
1992	53,363	4.2	25.2
1993	54,730	2.6	28.4
1994	54,284	(0.8)	27.4
1995	54,388	0.2	27.6

GENDER

Women outnumber men by a considerable margin at UNCF institutions. In fall 1994, women constituted 60 percent of the total enrollment at UNCF institutions while men constituted 40 percent of the total. As shown in Figure 2, the enrollment of women increased from 28,311 in 1989 to 32,375 in 1994—a 14 percent gain—while the enrollment of men increased from 20,085 to 21,909—a nine percent increase. During the years shown in Figure 2, the proportion of men and women at UNCF colleges has remained rather constant.

Three UNCF institutions are single-sex institutions: Bennett and Spelman for women and Morehouse for men. Excluding the single-sex institutions, only five UNCF institutions—the Interdenominational Theological Center, Knoxville College, Lane College, Livingstone College, and Texas College—report enrollments showing men in the majority. Again excluding the single-sex

Virginia	1,803	1,816	1,994	1,948	8	2

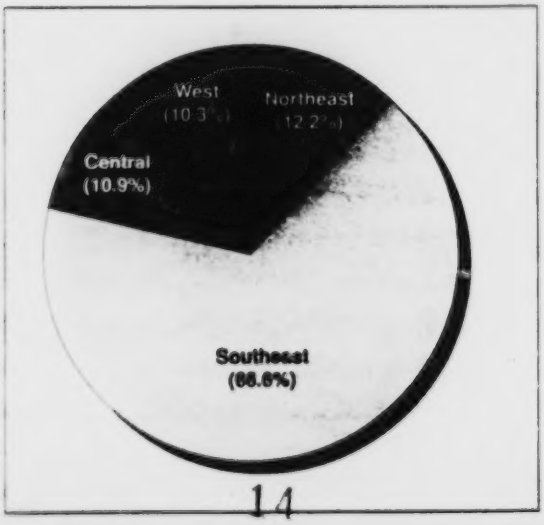
institutions, nine colleges had enrollments where women constituted at least two-thirds of the enrollment: Clark Atlanta University, Dillard University, Fisk University, LeMoyne-Owen College, Paine College, Rust College, Stillman College, Tougaloo College, and Xavier University. See Appendix F.

GEOGRAPHIC DIVERSITY

UNCF member institutions attract students from throughout the United States and from a number of foreign countries. In fall 1994 students came from 49 of the 50 states. Table 3 shows the 15 states sending the largest contingents of students for the years 1983, 1992, 1993, and 1994. (These states

FIGURE 3

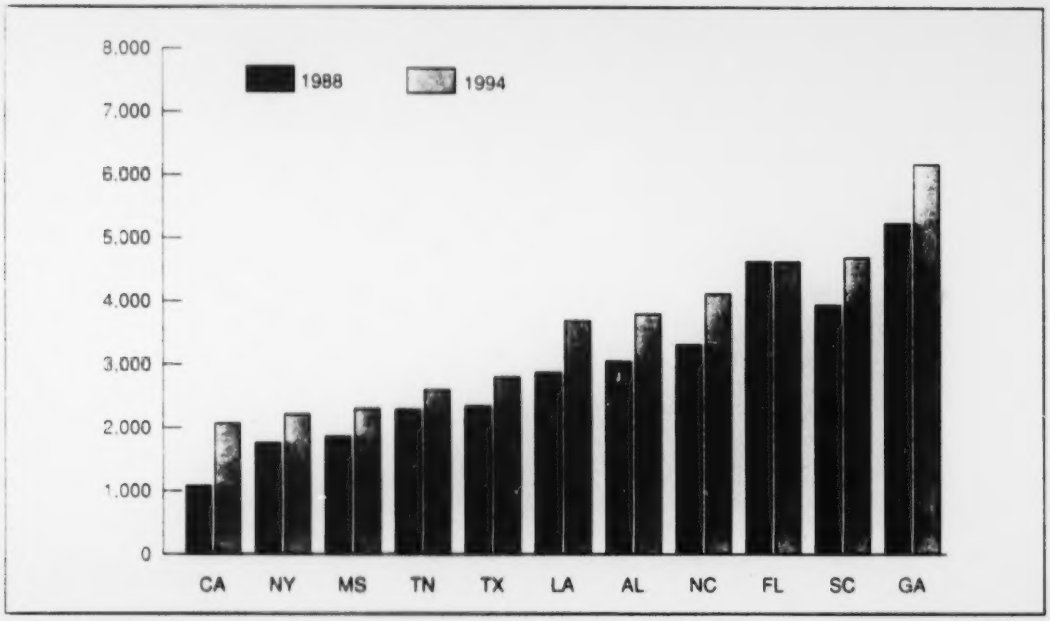
Geographic Origin Fall, 1994



BEST COPY AVAILABLE

FIGURE 4

Enrollment by States
Selected States: 1988 & 1994



include eleven of the twelve states in which UNCF institutions are located, plus California, Illinois, Michigan, and New York.) Table 3 shows the percentage increase between 1983 and 1994 and also between 1993 and 1994. Although Georgia continues to lead in the number of students enrolled in UNCF institutions, California has posted the largest percentage increase of any state since 1983. In fact, California's numbers increased by more than two and one-half times during the decade. Although California has posted a huge increase over the past eleven years, the number of students coming from California increased only two percent over the previous year. Among the states listed in Table 3, the ones showing the largest one-year percentage increase were Alabama and South Carolina.

Figure 3 shows the geographic origin of UNCF students. About two-thirds of the students come from the southeast and the other three regions each account for about ten percent of the enrollments.

Figure 4 shows the eleven states which sent the largest numbers of students to UNCF colleges in 1994. Note that two of the states, New York and California, are outside the South. Appendix G shows the state-by-state origin of UNCF students at each of the member institutions.

Atlanta, with 2,334 students of origin, continues to send more students to UNCF colleges than any other city; New Orleans, with 2,286 students of origin, is a close second. Cities which sent at least 1,000 students to UNCF colleges in 1994 included Birmingham, Chicago, Memphis, Miami, and New York City. The complete listing of principal UNCF campaign cities, and the number of students sent from each, is shown in Appendix H.

APPLICATION PROCESS

Applications for places in the freshman classes continue to increase at UNCF member institutions. For the fall 1994 term, 60,299 applications were received. Since 1986, applications have increased by 66 percent. Clark Atlanta University, with a total of 9,545 applications received, again led the UNCF member institutions in this respect. Other UNCF institutions that recorded over 2,000 applications included Benedict, Dillard, Florida Memorial, Morehouse, St. Augustine's, Shaw, Spelman, Tuskegee, and Xavier.

A record number of 38,770 applicants were approved for admission for the fall 1994 semester. Although some UNCF institutions continue to offer admission to all applicants who are high school graduates, a growing number have become more selective in the admissions process; many have been unable to admit larger numbers because of limited financial aid funds and limited student housing. Despite these difficulties, some 64 percent of the freshman applicants were offered admission.

The number of students actually enrolling has not been keeping pace with the number of applications or the number of students admitted. Although the number of new freshman enrollees has increased since 1986 (from 12,116 to 13,581), the percentage of admitted students who later enroll has been declining. In 1987, 48 percent of the admitted freshmen actually enrolled, but, in 1994, this percentage had dropped to 35 percent. This may suggest that students are facing severe financial difficulties and that many may not be finding the funds to enroll even though they have met the colleges' admissions criteria.

Table 4 and Figure 5 below show data concerning the admissions process for the seven-year period beginning in 1986. Appendix I shows data for individual UNCF institutions for fall 1994.

CHARACTERISTICS OF INCOMING FRESHMEN

Because a representative number of UNCF colleges participated in the annual freshman survey conducted by the Cooperative Institutional Research Program (CIRP)[2], it was possible to get a good description of UNCF entering freshmen and to compare them with new students at other private four-year colleges. The following descriptive data are derived from the responses of 4,347 freshmen who entered 12 private historically black colleges in fall 1994; most of these students attended UNCF institutions.

✔ 43 percent reported that they had a B+ or better grade point average in high school; over the past five years, the percentage of UNCF entering freshmen with B+ or better averages has increased substantially—from 28 percent to the current 43 percent.

✔ UNCF colleges, in contrast to other four-year colleges, draw students from greater distances; 51 percent of the entering freshmen traveled more than 500 miles to attend a UNCF college; only 13 percent of all private four-year college students traveled such distance.

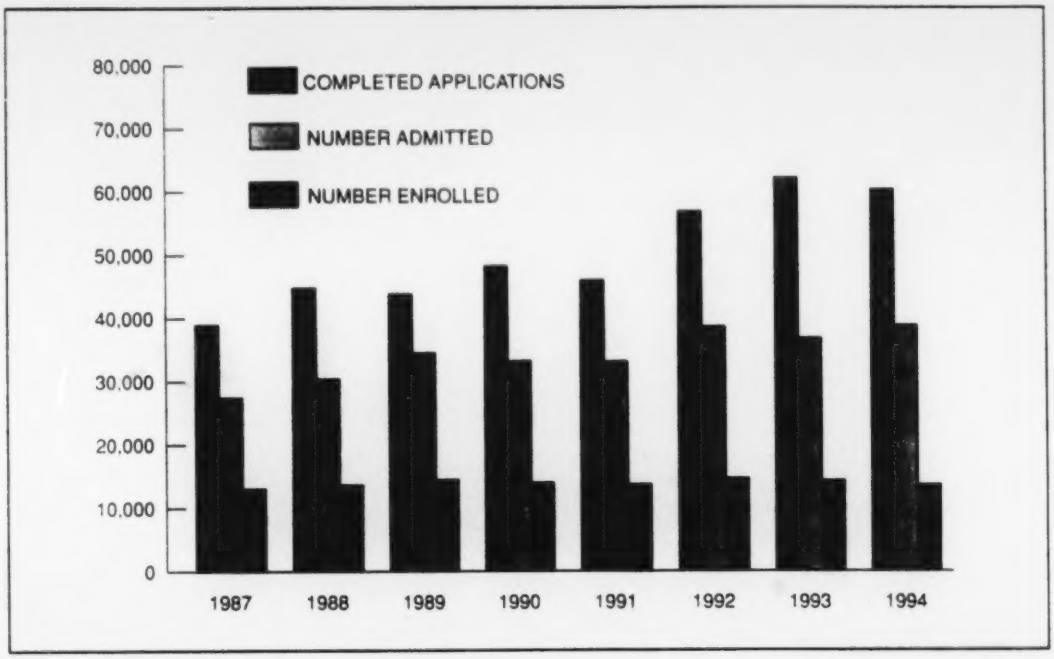
FIGURE 5

Admissions Process
UNCF Institutions 1987 – 1994



✔ 34 percent came from families where the estimated parental income was less than $25,000 compared to only 19 percent of the students at all private four-year colleges.

✔ The reported percentage of fathers who were unemployed was more than twice as high at UNCF colleges than at all four-year colleges: eight percent vs. three percent.

✔ Only four percent of the mothers of UNCF students were described as "homemaker"; in contrast, 12 percent of the students at all four-year colleges described their mothers as "homemakers".

✔ Only 45 percent said that they came from a home where both parents were living with each other; 71 percent of the students at all four-year colleges came from such homes.

✔ 51 percent reported their religious affiliation as Baptist; at all four-year colleges the largest religious representation was the 29 percent who identified themselves as Catholic.

✔ In contrast to the 12.5 percent of entering students at all institutions, less than two percent of the students entering UNCF instituions reported that they smoked cigarettes.

✔ Only four percent of entering UNCF students chose teaching as a probable career occupation; in comparison, 12 percent of the students entering all four-year colleges chose teaching as a probable career.

✔ In contrast to 57 percent of the entering freshmen at all four-year colleges, 77 percent of UNCF entering students said "good academic reputation" was the most important reason for choosing their particular college. Other reasons chosen by the UNCF students were: "graduates get good jobs", 66 percent; "graduates go to top graduate schools", 53 percent; "size of college", 43 percent"; and "offers special programs", 38 percent.

✔ The three most popular probable career choices for UNCF students were physician, 16 percent; engineer, 11 percent; and lawyer, 11 percent. At all four-year colleges the three most popular choices were teaching, 12 percent; business executive, seven percent; and physician, six percent.

✔ Students entering UNCF institutions have a high level of aspiration. In comparison with 18 percent at all four-year colleges, about twice as many of the UNCF freshmen (35 percent) say that they eventually hope to graduate with honors.

✔ 68 percent of the mothers and 56 percent of the fathers of UNCF students have attended college.

✔ The three leading objectives for UNCF students were to "be well-off financially", "become an authority in my own field", and "help others in difficulty."

DEGREES

In 1993-94, UNCF institutions awarded a record number of bachelor's degrees—6,915. This total represents a 40 percent increase over the number awarded in 1989-90. To put this development in perspective, it is important to note that between 1990 and 1994, undergraduate enrollment at all UNCF institutions showed only a modest increase—from 49,839 to 54,284, a rise of only 8.9 percent. Thus, during this five-year period, the rate of increase in the number of bachelor's degrees awarded has been much greater than increases in enrollments. The large increase in the number of bachelor's degrees awarded strongly suggest that these institutions are committed to practices which lead to the successful completion of programs of study by greater numbers of entering students. Some of this increase in graduation rates may be the result of greater selectivity, but much of the result can be attributed to the efforts of hundreds of dedicated faculty and staff who have worked tirelessly to bring about this result.

Since 1990, the rate of increase in awarding bachelor's degrees in various disciplines has shown considerable variation. Table 5 shows the number and percentage of graduates by area over this five-year period. The table also shows the percentage increase in the number of graduates between 1989-90 and 1993-94. Gains of 50 percent in the four-year period were recorded in education, the humanities, the life sciences, protective services, psychology, and the social sciences. Figure 6 shows the four-year increase in the five largest majors at UNCF colleges between 1990 and 1994: business and management, social sciences and social work, education, biology (life sciences), and the humanities (English, foreign languages, philosophy, and religion).

Although women comprise 60 percent of the overall enrollment at UNCF institutions, they accounted for 65 percent of those who received the bachelor's degree in 1993-94. In the fields of education, the health professions, and psychology, women accounted for 75 percent or more of the bachelor's degrees.

Trends in Areas of Study at the Bachelor's Level

Since 1989-90, the number of degrees in **biology** has risen 64 percent. Over 70 percent of the degrees in this field were awarded to women.

With nearly 29 percent of all bachelor's degrees, the field of **business and management** again accounted for far more bachelor's degrees than any other field at UNCF institutions. Its share of all bachelor's degrees increased over the prior reporting year. This field includes such areas as accounting, banking and finance, business administration, institutional management, and marketing.

The number of degrees in **communications** (mostly journalism) decreased slightly in 1993-94 from the previous year, but over the four-year period since 1989-90, the field has shown a 28 percent increase.

Computer science showed little change from the previous year in the number of bachelor's degrees awarded—from 261 to 265.

After a number of years of decline in the early and mid 80's, the field of **education** has experienced a substantial increase in the number of degrees awarded since 1989-90. Since that year, the number of graduates has increased from 418 to 682—a 63 percent gain. Education now accounts for ten percent of all UNCF graduates. In 1993-94, 82 percent of the degrees in this field were awarded to women.

Some 89 bachelor's degrees were awarded in **engineering** in 1993-94. All these degrees were awarded by Tuskegee University. Although Tuskegee is the only UNCF institution to award the bachelor's degree in engineering, 28 other UNCF colleges participate in dual-degree engineering programs with cooperating universities. Since these programs were established, 653 students have received engineering degrees. For details on the participation rate in these programs, see Appendix V.

The only area to show a decrease over the past four years was the **health professions**; this decrease was caused primarily by a change at Xavier University where degrees in pharmacy are now obtained at the professional level instead of the bachelor's level. In 1993-94, 83 of the 102 graduates in this field were women.

The percentage of degrees in the **humanities—English, speech, foreign languages, philosophy, and religion**—showed a 13 percent one-year increase—from 387 to 437. About three-quarters of the degrees in the humanities were awarded in the field of English. Relatively few degrees were awarded in foreign languages—seven in French and 12 in Spanish. The various fields in the humanities accounted for about six percent of all degrees in 1993-94.

Since 1989-90, the number of bachelor's degrees in **mathematics** at UNCF institutions has increased 39 percent. With 39 graduates in 1993-94, Spelman again led in the production of math majors. Women accounted for 70 percent of the graduates in mathematics.

Degrees in the **physical sciences**—primarily **chemistry and physics**—have increased 31 percent since 1989-90. Two institutions, Spelman and Xavier, accounted for almost half of the graduates in these fields.

Degrees in **protective services (criminal justice)** have increased 59 percent over the past four years.

Psychology has the greatest percentage growth of any field at UNCF institutions. Over the period since 1989-90, the number of degrees awarded in psychology has almost doubled—from 209 to 394. Three-quarters of the degrees in this field were awarded to women.

Included in the **social sciences** are **economics, history, political science, sociology, urban studies, public administration, and social work.** With 17 percent of the degrees awarded in 1993-94, the social sciences accounted for the second largest number of degrees at UNCF institutions.

Although the number of degrees in the **visual and performing arts** showed a slight one-year drop, the field has shown a 25 percent increase over the past four years. Degrees in this area account for about two percent of all degrees at UNCF institutions.

A wide variety of other areas accounted for four percent of UNCF bachelor's-degree recipients in 1993-94. Other unique programs at UNCF institutions include such fields as **airway science management, clothing fashion design, restaurant management, hospitality administration, and construction science.**

For details of the bachelor's degrees awarded by each UNCF institution, see Appendix R.

Graduate and Professional Degrees

The number of degrees awarded at the graduate/professional level increased 14 percent over the previous year. In 1993-94, UNCF institutions awarded 607 master's degrees, 113 professional degrees, and 38 doctoral degrees. At the master's degree level, 146 degrees were awarded in **education,** 95 in **business**, and 66 in **theology**. Of the professional degrees, 41 were awarded in divinity and another 46 in **veterinary science**. Of the 38 doctoral degrees, 14 were awarded in **education**. Altogether, 758 degrees were awarded at the graduate/professional level.

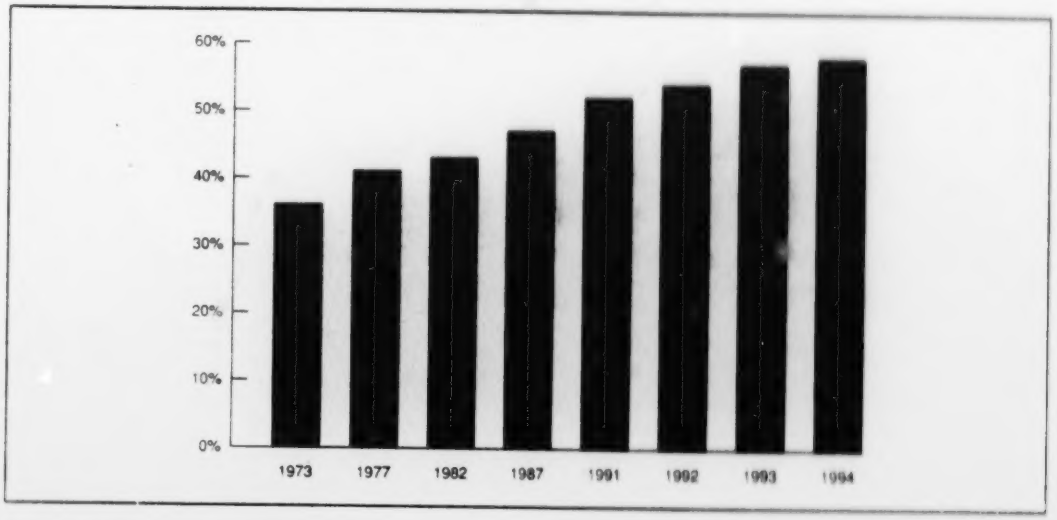
Detailed information about advanced degrees is shown in Appendices S, T, and U.

ACADEMIC PREPARATION

As shown graphically in Figure 7, the percentage of full-time faculty members at UNCF institutions who hold the doctoral degree has climbed steadily over the past two decades and reached an all-time high of 58 percent in fall 1994. One UNCF institution, the Interdenominational Theological Center, reported that over 90 percent of its faculty now hold the doctoral degree. Four institutions—Fisk, Johnson C. Smith, Spelman, and Xavier—reported that 75 percent or more of their full-time faculty members held the doctorate degree, while six other institutions—Bennett, Clark Atlanta, Morehouse, Philander Smith, Shaw, and Tuskegee—reported that 60 percent more of their full-time faculty have earned a doctorate degree. The continued steady improvement in the academic development of their full-time faculty has been one of the hallmarks of UNCF institutions.

FIGURE 7

Doctorates, UNCF Inst.
By Percent and Year Since 1973



GENDER/RACIAL CHARACTERISTICS

UNCF colleges and universities are models of gender/racial diversity in the composition of their full-time faculties. Although UNCF colleges serve a predominantly black student enrollment, 40 percent of their 3,160 faculty members are nonblack and 39 percent are women. See Table 6 and Figure 8. At nine UNCF institutions—Claflin, Huston-Tillotson, Knoxville, LeMoyne-Owen, Paine, Stillman, Voorhees, Wiley, and Xavier—nonblack faculty constitute 50 percent or more of the full-time faculty. Women outnumber men at the two women's colleges—Bennett and Spelman.

For details of the racial/gender composition at each UNCF college, see Appendix J.

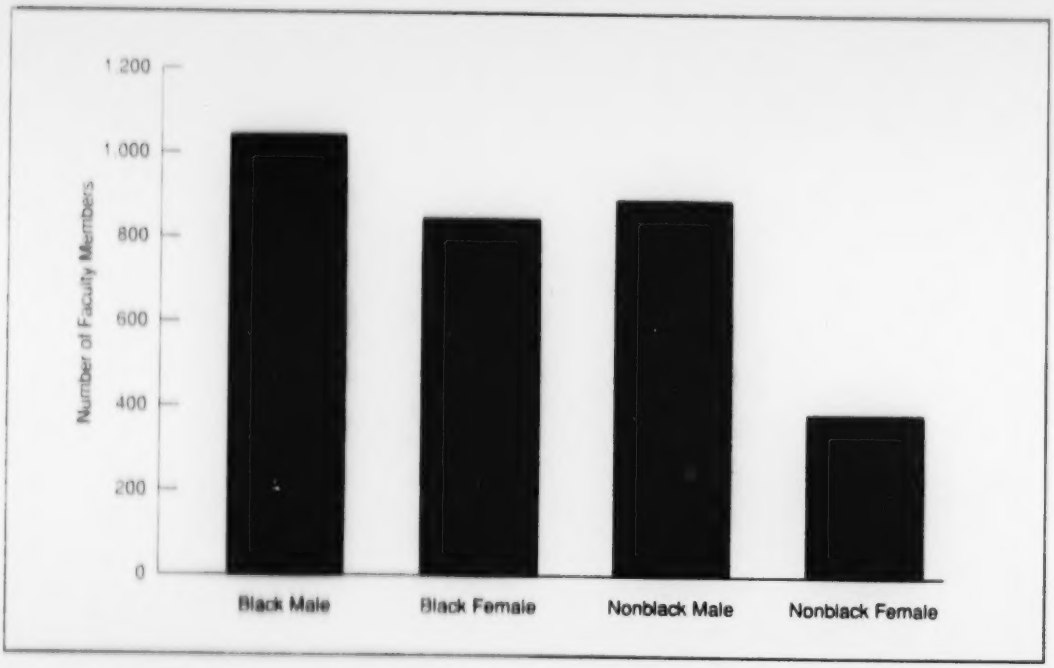
Faculty: Gender & Race
Fall 1994



FACULTY SALARIES

In the academic year 1994-95, the average faculty salary at UNCF member institutions was $30,658. This average salary was only two-thirds the $45,330 average found at all private baccalaureate institutions in the United States in that year. In comparison with salaries at church-related colleges, the average UNCF faculty salary was 81 percent as high.

UNCF faculty salaries are particularly low at the highest academic rank—full professor. Although the average salary of full professors at UNCF institutions ($38,378) represented a one-year gain of

TABLE 7

Average Fall 1994-95 Faculty Salaries at UNCF Institutions, at Private Baccalaureate Institutions, and at Church Related Institutions

BEST COPY AVAILABLE

12.5 percent, this salary was only 66 percent of the $58,040 average at all private baccalaureate institutions. The salaries of other faculty ranks at UNCF institutions in comparison to those at all private baccalaureate institutions were somewhat better: associate professors, 72 percent; assistant professors, 78 percent; and instructors, 81 percent.

Table 7 presents the average salaries for various faculty levels at UNCF institutions, all baccalaureate institutions, and at church related institutions. Also in Table 7 is the one-year percentage increase for each level.

Faculty Distribution by Area

Table 8 shows faculty distribution in various academic areas during four selected years since 1989. Perhaps one of the most striking points in Table 8 is the consistency of the data from year to year; in 1994, UNCF faculties were distributed in almost the same proportion as five years earlier. Although about 30 percent of UNCF students obtain degrees in business, only 11 percent of faculty members are in that area. This apparent discrepancy is explained by the fact that, at UNCF colleges as in most liberal arts colleges, students are generally required to complete an extensive general education program which involves taking many areas other than in the student's particular major.

Faculty Turnover and Faculty Tenure

The composition of the faculty at UNCF institutions has been quite stable over the past several years. Remarkably, there were the same total number (3,160) of faculty members in fall 1994 as there were in the previous year. Also in 1994, only six percent of the faculty retired or transferred to other employment, while seven percent were new appointees. These percentages have changed little over the past several years.

The proportion of the faculty holding tenure has increased somewhat in recent years. For example, in 1980-81, 22 percent of the full-time faculty persons held tenure while in fall 1994, 884 (28 percent) of the 3,160 full-time faculty members held such status.

Appendix L shows the faculty turnover and the number and percent of tenured faculty at each institution.

Staff Composition

As noted above, the number of full-time faculty members remained exactly the same in 1994 as it was in 1993. UNCF colleges have traditionally emphasized their teaching responsibilities and thus a high proportion of total personnel at UNCF institutions are dedicated to teaching. In 1994, faculty constituted 32 percent of the total personnel at UNCF institutions as compared to 29 percent at all U.S. colleges.

Table 8

Faculty Distribution by Academic Field of Study, 1989 through 1994

Health Professions	2	2	3	2
Computer Science	4	3	3	4

The number of full-time administrators increased slightly during the year from 2,451 to 2,507. Most of this increase involved adding personnel at the mid-level and "other" administrative levels. These positions include assistant vice-presidents, directors, managers, coordinators, and assistant directors. Administrators accounted for 25 percent of the personnel at UNCF institutions. Nationally, some 28 percent of full-time college and university personnel are administrators.

The size of the support staff at UNCF institutions was decreased by five percent over the past year—from 4,554 to 4,329; support staff constituted 43 percent of the personnel at UNCF institutions in 1995.

Table 9 shows the overall staff composition at UNCF colleges during the years 1992-93, 1993-94, and 1994-95. Appendices O and P provide the details of the staff composition at each institution for fall 1994.

THE NEED

Over one-third of the students who attended UNCF colleges and universities came from families where total income was less than $25,000 per year.[5] In comparison, less than 20 percent) of the students attending private colleges nationally in 1994 came from such low income families. Students coming from families with less than a $25,000 annual income can expect little or no contribution to the expenses of attending college from their families. In 1994, the median family income of students attending private black four-year colleges (the group which includes most UNCF member institutions) was $37,647; the median for families of all private college students was $49,370. Although students come to UNCF colleges from a wide range of family income backgrounds, the largest concentration is at the low end of the distribution. See Figure 9 below.

Because of the severe financial need of so many students, fully 85 percent of all UNCF students received some form of financial assistance. While about half of all four-year college students come from families with incomes over $50,000, only about one-third of all UNCF students come from such families.

An analysis of the financial aid needs of students from various family-income categories is shown in Table 10. Table 10 shows the percentage of UNCF students (excluding students from foreign countries) coming from each family-income category, the expected amount of contribution from the family toward college expense, and the total amount of aid need needed by students from a particular income category. In calculating the amount of need, Table 10 assumes that the average full cost of attending a UNCF institution in 1993-94 was $10,890 ($5440 for tuition and fees; $3200 for room and board; $1700 for personal expenses and transportation; and $550 for books and supplies.) Based on this average cost of $10,890, Table 10 shows the amount for each income category that could reasonably be expected to come from the family and the amount that would have to come from other sources—generally financial aid.

Table 10 also shows that the total amount of aid funds needed by students at UNCF institutions in 1993-94 was over $340 million. Although the deficit in aid funds is much less than in recent years, UNCF colleges and their students faced a financial aid shortage of some $16 million. This shortfall in aid funds meant that many needy

$60,000—$74,999	5,274	9.8	610	3,187
$75,000 and above	9,741	18.1	-0-	-0-
TOTAL	**53,820**		**$6,389**	**$343,891**

students were unable to buy necessary supplies or were unable to participate fully in extracurricular activities, which are an important part of college life; many, unfortunately, were forced to drop out of college because of the lack of funds.

Table 10 shows that middle-income families—as well as low-income families—face great difficulties in financing a college education for their sons or daughters. Even a family in the $40,000 to $50,000 income range needs an average of nearly $6,000 per year in student financial aid funds in order to meet the average costs at UNCF institutions. The average amount of need as shown in the above table is $6,389. This calculation uses all students; if the calculation considered only those students coming from families with less than $60,000 income, then the average need of this group would be $8,700.

CURRENT STUDENT AID RESOURCES

Table 11 shows that the total amount of student aid funds awarded $327 million in 1993-94, an increase of seven percent over the $291 million allocated for financial aid in 1992-93.

The largest single aid program, both in terms of dollars allocated and in the number of students receiving aid, was the Stafford Loan program. This program provided loans to two-thirds of all UNCF students; over $120 million was provided to UNCF students through this program in 1993-94. The Pell Grant program provided $56 million and served 59 percent of all UNCF students. In terms of the size of award, the ROTC scholarship program with an average award of $6,315 was by far the most generous, but this program provided awards to less than one percent of all UNCF students.

TRENDS IN STUDENT FINANCIAL AID

Tables 12A, 12B, and 12C below highlight the trends of the six largest student aid programs at UNCF institutions over the past five years.

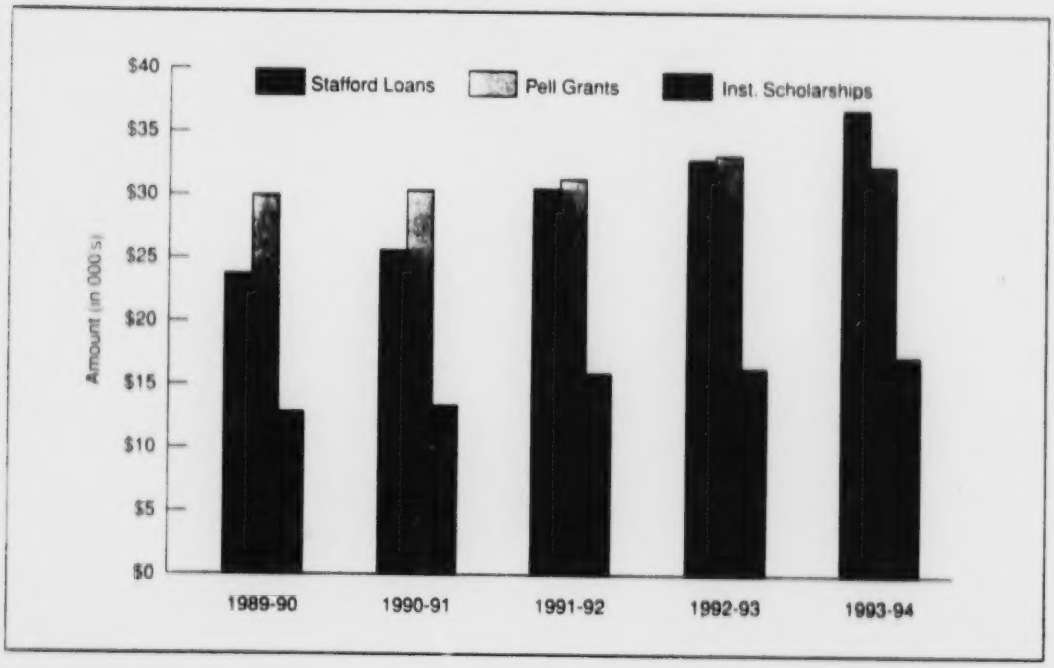
Table 12A relates to the number of students who received assistance during the five-year period between 1989-90 and 1993-94. During this period, the Stafford Loan program and institutional scholarships showed the greatest growth in the number of students served. The Stafford Loan program grew 56 percent during this period and institutional scholarships showed a substantial 27 percent gain. On the other hand, the Federal college work-study program served 22 percent fewer students in 1993-94 than in 1989-90.

Figure 10 shows the number of students receiving aid through three of the major aid programs during the five-year period 1988-89 through 1993-94. Note the large growth in the Stafford Loan program and the institutional scholarships programs. The Pell Grant program, although the largest in terms of the number of students served, has not keep pace with enrollment increases.

Table 12B, which details the amount of funds expended through various programs, also shows that the Stafford Loan program and institutional scholarship programs carried out by the colleges

FIGURE 10

Students Receiving Aid
Three Aid Programs: 88 – 89 — 93 – 94



themselves were the only aid programs to expand in real dollars during the past four years. In analyzing the data in Table 12B, it is important to remember that UNCF enrollments grew 13 percent during the period and that the value of the dollar declined by about three and one-half percent a year due to the annual increase in the Consumer Price Index (CPI). Except for the

Stafford Loan program and institutional scholarships, the other major programs—Pell Grants, college work-study program, SEOG, and state scholarships—failed to keep pace with a rising CPI and the student enrollment increases.

Figure 11 shows the rapid rise of the Stafford Loan program in contrast to two other aid programs.

Changes in the average awards during the past four years are shown in Table 12C. (With an annual inflationary rise of approximately three and one-half percent, the percent increase in those programs should have been around 12 percent in order to keep pace with the CPI.) Three programs—the Stafford Loan program, institutional scholarships, and the college

work-study program—have kept pace with inflationary increases, but the other three major programs have not sufficiently increased their average awards to compensate for the rising cost of attending college. The college work-study program has increased by the largest amount, but the number of students participating in this program has declined.

College Costs

In 1994-95, the cost of attending a UNCF member institution remained less than half that of attending other private four-year colleges and universities in the United States. The data shown graphically in Figure 12 below compares expenses at UNCF institutions with expenses at all private colleges in the United States. For details of the costs at each UNCF college, see Appendix X.

From 1993-94 to 1994-95, the average cost of tuition and fees at UNCF colleges rose from $5,441 to $5,617—an increase of $117 or 3.2 percent. This average increase of $117 at UNCF institutions was much less than the increase of $497 at all four-year colleges. The UNCF average charge for tuition and fees ($5,617) remains at nearly 50 percent less than that charged by private colleges nationally ($11,025).

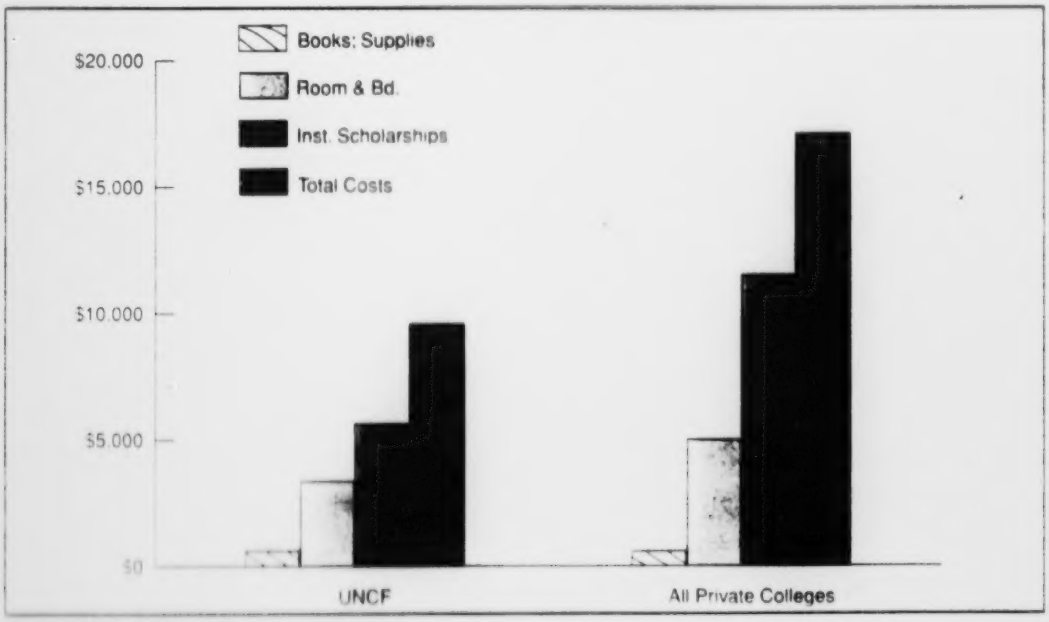
Average room and board charges at UNCF colleges rose 4.5 percent over the previous year—from $3,206 to $3,352. Compared to private colleges nationally, the charges for room and board for a typical UNCF student living on campus were one-third less.

The average cost of books and supplies at UNCF institutions increase slightly—from $551 to $595. The cost of books and supplies was approximately the same at all four-year colleges.

The average institutional cost (tuition and fees, room and board, and books and supplies) of attending a UNCF college in 1994-95 rose only $366 over the previous year—from $9,198 to $9,564, a 4.0 percent rise. When compared with the average national private college cost of $17,096, the average basic cost at UNCF institutions was considerably less. By keeping their costs relatively low, UNCF institutions continue to give thousands of students the opportunity to attend a quality four-year private college.

Figure 12

Basic Costs 1994 – 95
UNCF Inst. & Other Private College



For the fiscal year ending June 30, 1994, the member institutions reported revenue that averaged $19.5 million; expenditures averaged $18.9 million. In comparison with figures for 1992-93, average revenues increased 6.1 percent while average expenditures increased 3.5 percent. Thirty-one (three-quarters) of the 41 member UNCF institutions reported revenues which exceeded expenditures. Revenues at all 41 institutions reached nearly $800 million in 1993-94.

REVENUES

Revenues continue to be derived from three main sources: student tuition and fees, government, and private gifts and grants. Those three sources accounted for 83 percent of all revenues in 1993-94. As shown in Table 13, tuition and fees has fluctuated, as a source of revenue, at between 35 and 38 percent since 1984. In 1993-94, 38 percent of revenues came from this source. The percentage from government has increased from 20 percent in 1985-86 to 28 percent in 1993-94. The proportion of UNCF colleges' revenues coming from private gifts and grants has fluctuated between 17 and 19 percent since 1985-86; in 1993-94, 17 percent came from this source.

Much of the revenue derived from government is in the form of grant funds restricted for student financial aid. Funds for campus-based Federal student aid programs would be an example of this kind of income. (Pell grants are awarded to the students and then the students use this grant money to pay their tuition and fees and other expenses; Pell grants do not go directly to the college.) Other significant amounts of government revenues come from Title III of the Higher Education Act of 1965; except for the Interdenominational Theological Center, all UNCF institutions derive at least $500,000 per year from this source. A third major part of government funds support research contract activities carried out by the colleges.

1993-94	22	2	7	2	18	18	9	8	10	3

Alumni support accounted for over $8.5 million in private gift and grant contributions during 1991-92. Appendix AA shows that of the 260,522 living alumni of UNCF institutions, over 34,000 (14 percent) made a financial contribution during the year. Altogether, their contributions averaged over $250 per contributor.

The funds derived from auxiliary enterprises are chiefly those associated with the operation of college cafeterias and dormitories. Typically, operation of these facilities results in a small net profit for the institution. (In 1993-94, some 13 percent of the revenues came from auxiliary enterprises, while only 10 percent of the colleges' expenditures were used to cover operating costs associated with these activities.)

In comparison to the above data, Table 14 shows the latest available U. S. Department of Education figures (1993-94) for private institutions of higher education in the United States. (The table excludes revenues for federally financed research-and-development centers and revenues received in conjunction with the operation of university hospitals.)

A comparison of the sources of revenues of UNCF institutions and those of other private colleges shows that other private colleges derive almost half of their revenues from tuition and fees; at UNCF colleges, tuition and fees account for only about one-third of operating revenues. Since UNCF institutions derive a much smaller proportion of their revenues from tuition and fees than do other private colleges, part of the challenge of the mission of the United Negro College Fund is to bridge this gap. The data also show that the UNCF institutions rely more on private gifts and grants than other private institutions for obtaining crucial operating funds; 17 percent of UNCF revenues come from gifts and grants as opposed to only ten percent at all private institutions. The revenues obtained by UNCF institutions from government sources come primarily from the federal government and are generally restricted for use for student aid and for programs through Title III of the Higher Education Act;

UNCF colleges receive little or no support from state or local governments.

EXPENDITURES

A significant financial development has been the rapid rise in the proportion of institutional funds that must be spent for student financial aid. As shown in Table 15, student aid (scholarships) now accounts for 18 percent of all expenditures at UNCF institutions. In comparison, Table 16 shows that other private colleges spend only twelve percent of their operating budget for student aid.

The pattern of expenditures (in terms of percentage of total expenditures) at UNCF institutions has changed little since 1985-86. The costs for instructions are still the largest items in the colleges' budgets. After showing sharp increases during the late 80's, the proportion expended for student aid has declined somewhat over the past two reporting years.

Other expenditures also showed little change from those reported in prior years. Institutional support (general administration, the business office, and the registrar's office) accounted for 18 percent. Academic support, (e.g., computer assisted instruction, the library, and the developmental programs) accounted for seven percent. Maintenance of the physical plant required nine percent while the costs associated with auxiliary enterprises (the book store, cafeterias, and dormitories) accounted for ten percent of the colleges' budgets.

Table 16 shows the latest available U. S. Department of Education figures (1993-94) for expenditures at private colleges and universities in the United States. (Expenditures for the operation of university hospitals are excluded.) UNCF colleges spend a far larger proportion of their operating funds on student aid than do other private colleges and universities.

Details of each college's sources of revenues and categories of expenditures are shown in Appendix Z and Appendix BB. The total revenues and expenditures for each college are shown in Appendix Y.

ENDOWMENT

Total endowment funds at all UNCF member institutions again exceeded a half billion dollars for the fiscal year ending June 30, 1994. Led by Spelman College with an endowment fund of over $110 million, the grand total of all endowment funds at UNCF colleges was $533.7 million for the reporting year. The overall one-year increase in the market value of the endowment funds was less than one percent; the total value of the funds in 1992-93 was $529.5 million. The average value of the endowment funds was $13.0 million. Although the growth over this past reporting year has been modest, the growth of the endowment funds at UNCF colleges has been spectacular over the past several years. Figure 13 below graphically shows the growth of the endowment funds since 1984-85.

About two-thirds of UNCF institutions hold endowments of less than $10 million. See Table 17. In addition to Spelman, nine other UNCF institutions—Bethune-Cookman, Clark Atlanta, Dillard, Morehouse, Rust, St. Augustine's, Stillman, Tuskegee, and Xavier—hold endowments valued at over $15 million; these ten institutions account for nearly two-thirds of the total held by all UNCF institutions.

Appendix CC shows the market values of the endowment funds for the past three reporting years at each individual UNCF institution.

The average amount of endowment per student at UNCF colleges and universities now stands at $9,832; although this figure has doubled since 1983-84, it is still less than one-third of the average amount reported by other private colleges and universities in the United States.
